COMMERCIAL DIVING – PHYSICAL EXAM

Applicant's Name

Address

Age

Telephone Number

City

Zip

State

TO THE PHYSICIAN:

This applicant has applied for admission to the Marine Technology Program at Santa Barbara City College for training in commercial diving as a topside diving team member and as a diver. The applicant should complete the Commercial Diving Medical History Form prior to the exam.

All candidate diving personnel must undergo a thorough physical examination prior to being exposed to hyperbaric conditions. Subsequent to the initial examination, all diving personnel are required to be re-examined at 12-month intervals.

The examining physician should interpret any physical findings on the basis of the kind of occupation to which the applicant aspires. For example, a position as an air diver requires a less extensive examination than does a position as a saturation diver, but more extensive than that required for topside personnel. With this as a frame of reference, the applicant's cardio-vascular, gastro-intestinal, genito-urinary and neuro-muscular systems should be assessed to determine if the <u>physical exertion</u> necessitated by the <u>type of diving</u> planned will be harmful to the organ system in question, and if the condition of any organ system would make it difficult or impossible for the prospective diver to carry out the planned exercise or exertion.

OPTIONAL TESTS:

Additional laboratory procedures may be employed at the discretion of the examining physician depending upon the strenuousness of the anticipated diving operations. These may include: Stress electro-cardiography, tests demonstrating sensitivity to oxygen and carotid sinus sensitivities, full chest film, pulmonary function tests (i.e., one-second times vital capacity and tests for air trapping), audiogram, radiographic examination for dysbaric osteonecrosis, special blood studies and electro-encephalography.

PHYSICIAN QUALIFICATIONS:

The examining physician must be familiar with and experienced in the physical requirements and medical aspects of compressed gas diving. In the absence of an examiner with knowledge of hyperbaric medicine, examinations should be made by a physician who understands the need and purpose of the examination, and who has had prior experience in examining individuals who will be exposed to strenuous work conditions and hazardous environments. The "Association of Diving Contractors Consensus Standards for Commercial Diving Operations" section III-B provides examination standards which may be used as a basis for completing the examination. *All completed physical examinations will be forwarded by the SBCC Marine Technology Department or to the department's Medical Review Officer for review, prior to final approval.*

EXAMINATION:

(<u>To be completed in its entirety by the Physician</u>- Please examine and **initial as complete** each of the items below. If considered abnormal indicate under "remarks" the pertinent details.) **Attach lab reports, items 22, 23 & 24.**

	Blood Pressure:Systolic	
	Blood Pressure:Diastolic	
	Pulse: Resting 2 min. post exercise	
1.	General Appearance	
	(inc. obesity, gross defects, postural abnorm.)	
2.	Head and Neck	
3.	Eyes (inc. visual acuity for glasses)	
4.	Nose and sinuses	
5.	Ears	
	(inc. visual acuity, need for glasses Rx)	
6.	Spine	
7.	Lungs and chest	
8.	Heart	
9.	Abdomen & Viscera	
10.	Inguinal rings	
11.	Genitalia	
12.	Anus and rectum	
13.	Upper extremities	
14.	Lower extremities	
15.	Neurologic	
16.	Skin reactions or eruptions	
17.	Psychiatric (inc. emotional stability)	
18.	Chest X-Ray- 2 view necessary	
19.	Eye grounds exam	
20.	Mouth and throat	
21.	Vital Capacity	
22.	C.B.C (attach report)	
23.	U/A- (attach report)	
24.	Drug screening (attach report)	
	(SAMHSA- 5 Panel Drug Test)	

CONTRAINDICATIONS

ABSOLUTE DISQUALIFICATION. Contraindications include:

- 1. Definite emotional instability or mental retardation
- 2. Subject to faintness or blackout (i.e., epilepsy, brittle diabetes, dysrhythmias, synocopal attacks)
- 3. Subject to pneumothorax (i.e., previous pneumothorax, bleb, cystic or obstructive disease of the lungs)
- 4. Certain cardiac abnormalities (i.e., pathological heart block, valvular disease, interventricular septal defects)
- 5. Active asthma
- 6. Diabetes
- 7. Abnormal findings on drug screening

RELATIVE DISQUALIFICATION. Contraindications include:

- 1. Gross obesity
- 2. History of neurological decompression sickness
- 3. Perforation of tympanic membrane
- 4. Grossly impaired hearing A hearing loss of either ear of 35 dB or more, at frequencies up to 3000 Hz and 50 dB or more, at frequencies above 3000 Hz to minimum of 6000 Hz is an indication for referral of the candidate to a specialist for further opinion.
- 5. History of severe motion sickness
- 6. Seriously impaired pulmonary function
- 7. Pulmonary fibrosis
- 8. Chronic alcoholism
- 9. Peptic ulcer
- 10. Chronic hepatitis
- 11. Sickle cell anemia
- 12. Disabilities requiring certain medications for control (proper prescription medications may be a contraindication)
- 13. Renal colic caused by kidney stones
- 14. Pregnancy
- 15. Evidence of neurosis, recklessness, accident proneness or panicky behavior
- 16. Metal pins, plates or devices implanted in the body
- 17. Abnormal findings on drug screening. (i.e. testing positive on D.O.T. SAMSHA Panel 5 screen)

TEMPORARY DISQUALIFICATION. Contraindications include:

- 1. Acute alcoholism or drug intoxication
- 2. Acute gastrointestinal syndrome
- 3. Acute infections of skin, upper respiratory, ear, etc.
- 4. Recent incident of serious decompression sickness

REMARKS:

PHYSICIAN'S RECOMMENDATION - check one of the following:

Physician's Name and Address Stamp (Required. A business card may be stapled in lieu of a stamp)

We have reviewed the Commercial Diving Medical History and Commercial Diving Physician's Examination Report forms and find the applicant suitable for training in the Marine Diving Technology Program at SBCC. No contraindications to diving.
